Sectigo Connector for Microsoft Sentinel

As cybersecurity threats evolve, organizations require robust solutions to secure their data and infrastructure. Microsoft Sentinel is a comprehensive, cloud-native SIEM solution that enhances threat detection and response capabilities. However, effective security monitoring goes beyond threat detection—it also requires seamless access to reliable audit logs of your digital certificate assets.

Without proper certificate management, networks are susceptible to breaches and unauthorized access. Integrating your certificate management with Microsoft Sentinel ensures that organizations can securely access and analyze audit logs within a centralized environment, significantly improving their security posture and operational efficiency.

What should MS Sentinel users be looking for:

Microsoft Sentinel users should prioritize solutions that enhance visibility and automation within their infrastructure. When selecting an SSL/TLS certificate management solution, it is essential to look for features that improve operational efficiency through automated workflows, support seamless integration, and offer robust support and maintenance services. Consider the following when choosing a Certificate Lifecycle Management (CLM) solution:

- Support for automated workflows that efficiently manage certificate issuance, renewal, and replacement at scale.

- Capability to provide centralized control and visibility for audit logs within the Microsoft Sentinel environment.

- Ensure easy access to detailed and reliable audit logs at customizable intervals.

- Options for real-time monitoring of audit logs as needed.

- A reputable and reliable CLM provider with robust support.

Sectigo can help

With the Sectigo-Microsoft Sentinel integration, you can streamline your certificate management and bolster security within your Sentinel environment. This integration provides seamless access to reliable audit logs and enhances visibility into SSL/TLS certificate activities directly from the Sentinel dashboard.

Sectigo offers automated workflows for issuing, renewing, and replacing certificates, ensuring comprehensive visibility and compliance simplicity for your business.

Sectigo-Sentinel Integration

Sectigo's integration with Microsoft Sentinel simplifies and secures certificate management within your Sentinel environment. This integration enables seamless access to Sectigo Certificate Manager's audit logs directly from Sentinel, enhancing visibility and operational efficiency in monitoring security events.

IT teams can customize audit log retrieval intervals to meet specific organizational needs, ensuring real-time monitoring capabilities. By centralizing audit logs and supporting customizable notifications, Sectigo empowers organizations to strengthen their security posture and achieve better outcomes in threat detection and incident response.

Leveraging Sectigo Certificate Manager for Microsoft Sentinel enables your IT teams to benefit from:

Enhanced security monitoring: Centralize your Sectigo audit logs within Sentinel's dashboard for improved monitoring and analysis, leading to quicker threat detection and response, and a noticeable reduction in security incidents.

Increased operational efficiency: Customize data retrieval intervals within Sentinel to reduce manual efforts by your IT teams and streamline operations.

Improved user experience: Flexibility to set up a storage container via the command line or within the Sentinel UI as you prefer.

Streamlined compliance checks: Enable real-time monitoring for effortless compliance audits and investigations directly within the Sentinel environment.

The Sectigo advantage

Integrating Sectigo Certificate Manager with Microsoft Sentinel offers a multitude of advantages for organizations. Benefit from seamless access to reliable audit logs directly within Sentinel, ensuring enhanced visibility and streamlined security monitoring. By centralizing certificate audit logs and automating certificate management processes, organizations can optimize their security operations, improve efficiency, and strengthen their overall security posture within the Microsoft Sentinel environment. This integration not only reinforces organizational defenses but also ensures resilient and efficient security management.

About Sectigo

Sectigo is the industry's most innovative provider of comprehensive certificate lifecycle management (CLM), with automated solutions and digital certificates that secure every human and machine identity for the world's largest brands. Its automated, cloud-native, universal CLM platform issues and manages digital certificates provided by all trusted certificate authorities (CAs) to simplify and improve security protocols across the enterprise. Sectigo is one of the longest-standing and largest CAs with more than 700,000 customers and two decades of delivering unparalleled digital trust. For more information, visit www.sectigo.com, follow us on LinkedIn, and subscribe to our Webby award-winning podcast, Root Causes.

Sectigo SSL/TLS certificates and CLM solutions help you enforce cryptographic strength, maintain compliance, and future-proof your network security. By integrating with Microsoft Sentinel, Sectigo keeps your teams informed with event sharing, tracking, and intelligence consolidated into a centralized dashboard. For more information on Sectigo's Microsoft Sentinel integration, SSL/TLS certificates or certificate management in general please contact Sectigo Sales at sales@sectigo.com.
