Version History

- 1.00 Original version.
- 1.01 Some variables description updated.
- 1.02 Updated description of variable *adminEmailAddress*

1. Request

The request should be POSTed (rather than GETed) to the above URL.

Required variables are in **bold**.

Optional variables are in *italics*.

Variables that are sometimes required are in *italics* with a * next to them

Variable Name(case insensitive)	Type	Max. Length	Description
loginName	string	64 chars	Account Username (case sensitive).
loginPassword	string	128 chars	Account Password (case sensitive).
action	string	100 chars	One of available actions (see list below for possible values).
orderNumber	string	128 chars	The Order Number of a certificate for which a click-through is required
<i>adminEmailAddress</i> *	string	255 chars	User's email address (required for action ' ReplaceMailAddress ', optional for other actions)

Descriptions for **action** variable values:

Action	Description
ReplaceMailAddress	Replaces click-through email and sends Email to customer
ResendEmail	Re-sends Email to Customer

2. Response

The MIME type will be *application/x-www-form-urlencoded*, because the format of the response will be the same "URL-encoded" format as the request (e.g. name1=value1&name2=value2).

Variable Name (case insensitive)	Type	Description
errorCode	integer	Error code (see list below for possible values).
errorMessage	string	Explanation of error.
status	integer	Action result
description	string	Explanation of status

Descriptions for **action** statuses:

Action(s)	Status Value	Description
Any action	0	Action is not relevant for current order state, was not completed
Any action	1	Successfully completed
ReplaceMailAddress	2	Email Address was the same and wasn't changed. Email was re-sent.

Here are the possible values for “errorCode” and “errorMessage”:

errorCode	errorMessage
0	Successful
-1	Request was not made over HTTPS!
-2	'xxxx' is an unrecognized argument!
-3	The 'xxxx' argument is missing!
-4	The value of the 'xxxx' argument is invalid!
-14	An unknown error occurred!
-16	Incorrect login details, account is locked, password has expired or your source IP is blocked.
-17	Request used GET rather than POST!
-20	Order relative errors (see errorMessage for details)
