

Web Accelerate

Secure and accelerate how your website delivers content with an Intelligent network of global servers that deliver content at lightning speeds.

Customers will wait – at most – 15 seconds, then leave your site and never come back. This may not seem like a big deal, but it has fiscal impacts on businesses of all sizes. Research revealed that even one second page delay could decrease customer satisfaction by 16% with 7% loss in conversions, thus potentially costing businesses \$2.5 million in sales every year. The best way to increase website speeds, save money, protect your reputation and improve your search rank is to deploy a Content Delivery Network (CDN).

IMPROVE SPEED

With instant purge, real-time analysis, intelligent caching and built-in DDoS protection, website loading speeds can improve up to 68% while reducing bandwidth by 40%-70% on average.

SECURITY, SPEED AND SIMPLICITY

- ✓ 45 Edge Locations
- ✓ 65Tbps Total Throughput
- ✓ 2600+ Peering Partners
- ✓ 28,000+ Global ASNs

WEB ACCELERATE COMPATIBILITY

Works with all popular content management systems (CMS)

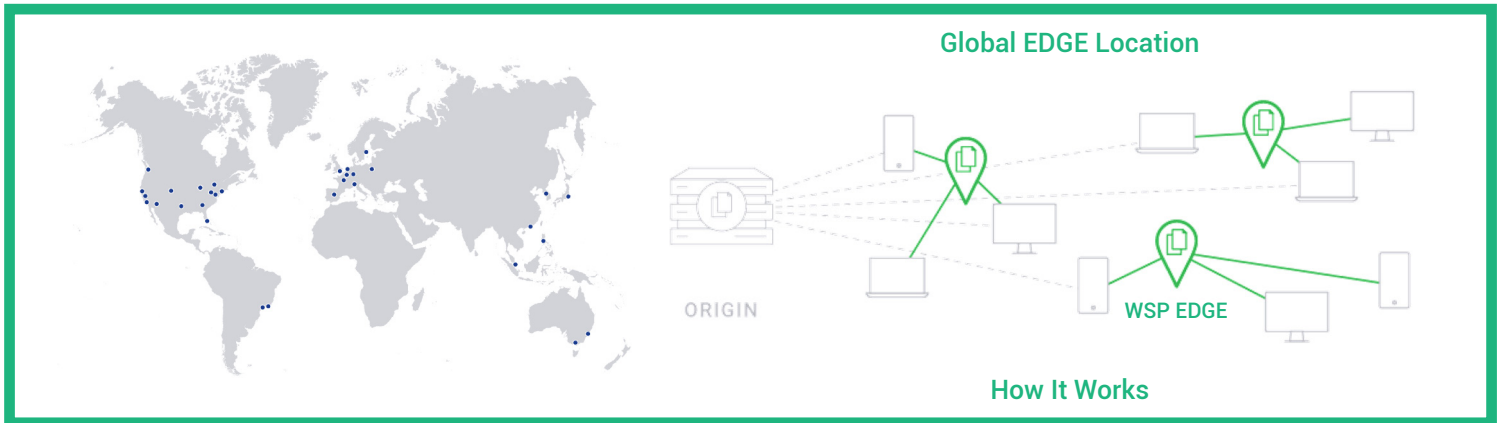

WEB ACCELERATE BENEFITS

- ✓ Increases your website's speed by 50% on average
- ✓ Static content caching
- ✓ Uses 40-70% less bandwidth
- ✓ Fully secures end-to-end encryption for SSL
- ✓ Enables high volumes of traffic with zero lag time
- ✓ Improves SEO ranking

GLOBAL EDGE LOCATION

Sectigo Web Security Platform's (WSP) CDN stores your most recently and frequently requested content in edge locations close to where the content is being demanded. That way content can be delivered to end users more quickly and reliably, for a superior end user experience and more efficient operations.

■ INTELLIGENT & CUSTOMIZED CACHING

Insightful caching policies keeps content available at the edge longer. Finetune how, how long, and even where content is stored.

■ INSTANT PURGE

Remove content from cache worldwide at the push of a button – deleting content from our CDN (whether through the customer portal or via API), it immediately is no longer served via Sectigo, anywhere.

■ LITE DDoS PROTECTION

Complete Layer 3-4 DDoS Protection will mitigate any attempt to overwhelm your applications with large-volume traffic, causing them to become overloaded and unavailable for legitimate users.

■ IMPROVED SEO (TTFB)

Sectigo Web Accelerate CDN constantly monitors usage patterns and minimizes your TTFB through its dynamic caching technology.
