Web Clean

**Always-on automated malware removal
and vulnerability platform patching solution**

No business is too small to attack. The financial consequences of a cyberattack for SMBs have increased by 25% since 2017. Attacks resulting in a disruption to normal operations cost an average of $1.56 million. Malicious attacks are by far the most common and expensive root cause of cyber attacks due to the length of time it takes to detect and mitigate the attack. Organizations that utilize an automated security solution to mitigate attacks saw a 51% lower cost in loss of business after experiencing a data breach.

FIND AND REMOVE

With daily scanning capabilities, find and automatically remove cyberthreats from any website today. Gain peace of mind by never having to worry about being blacklisted or suspended

CYBER TECHNOLOGY ON YOUR SIDE

SECTIGO WEB
SECURITY PLATFORM

COMPREHENSIVE MALWARE REMOVAL

Sectigo Web Clean does more than just clean websites of malware. It includes automatic monitoring, patching and threat removal – safeguard your website against cybercriminals and other online security threats.

DAILY SCANS
Sectigo scans websites from the user's point of view (outside-in) to catch signs of malware before the visitor or search engines do.

AUTOMATIC MALWARE REMOVAL
Our technology and experts automatically remove malware with minimal user action and without any downtime or disruption in site functionality.

AUTOMATED DATABASE CLEANING
Automatically removes malware infections from popular database driven-websites such as WordPress, Joomla! , or any web application using a MySQL database.

CUSTOMIZED PROTECTION
Protection from unauthorized access through database and SEO SPAM with blacklist remediation ensures optimized site uptime.
