Sectigo Web Performance Plan

Because Websites Demand More

Websites need to provide an exceptional visitor experience and that requires more than just good content and design. Keeping bad actors' from disrupting online presence, ensuring optimal page upload speed, maintaining improved search engine optimization (SEO) rankings – the checklist for having an optimized website keeps growing. The Sectigo Web Performance plan finds security risks, patches vulnerabilities, removes malware, blocks DDoS attacks, boosts page upload speed and auto-backup sites all within one plan.

Optimize Website Speed

Search engines love fast websites – the faster a website, the better chance in moving up in SERPs resulting in more site visitors. The Web Performance plan has the Sectigo Accelerate Global Anycast CDN featuring DDoS protection for security, Intelligent storing and delivering content closest to customer locations. It's preset for autopilot, but you can easily make unique changes or wipe settings with Instant Purge. **Resulting in 68% improved website** loading speeds for happier visitors, plus brand trust and more sales.

Every Second Counts

A one second delay in page load time leads to...

47%
Expect sites to load in less than 2 seconds

16%
decrease in **customer satisfaction**

11%
fewer **page views**

7%
loss in **customer conversions**
