

<https://secure.trust-provider.com/products!/AutoAuthorize>
and <https://secure.trust-provider.com/products!/AutoReject>

Version History

1.00	Original version.
1.01	Typo in urls corrected.
1.02	Added "disableSWP" parameter
1.03	Added errorCode -114, -115
1.04	Added errorCode -122
1.05	Added "slUserID" and "slSiteID" parameters

"AutoAuthorize" and "AutoReject" may be used by Resellers to authorize and reject orders without having to login to the Sectigo Account Management system and click the "Authorize" and "Reject" buttons.

1. Request

Required variables are in **bold**.
Optional variables are in *italics*.

Variable Name (case insensitive)	Type	Max. Length	Allowed Values	Description
loginName	string	64 chars		Account Username (case sensitive)
loginPassword	string	128 chars		Account Password (case sensitive)
orderNumber	integer		Any order number belonging to one of your customers.	An order number
<i>test</i>	char	1 char	Y or N.	If Y (or y), the order will not actually be authorized/rejected. If omitted, it's value defaults to N.
<i>disableSWP</i>	char	1 char	Y or N. <i>Note: Only relevant for AutoAuthorize.</i>	If Y, the free web products will not be added to this SSL certificate order. If N, free web products will be added to SSL certificate when applicable. If omitted, its value defaults to N.

2. Response

2.1 First line

Line	Possible Value(s)
Mime Type	text/plain
Line 1: <i>Status Code</i>	0 = Successful -1 = Request was not made over https! -2 = Unrecognised argument! -3 = The 'xxx' argument is missing! -4 = The value of the 'xxx' argument is invalid! -14 = An unknown error occurred! -15 = Not enough credit! -16 = Permission denied! -17 = Request used GET rather than POST! -27 = Order 'xxx' is not currently Awaiting Authorization/Rejection! -114 = Error while getting duration! or PPP not found! (<i>additional details may also be provided – product ID, duration, etc.</i>) -115 = No price found for the product! (<i>additional details may also be provided – product ID or name, pricing band ID, etc.</i>) -122 = a generic error that shows the SiteLock synchronous sync errors

2.2 If Status Code < 0

Line	Possible Value(s)
Line 2: <i>Error Message</i>	Textual representation of error message.
Line 3: <i>slUserID</i>	The SiteLock user ID. This parameter is only present if a SiteLock licence is the only product ordered.
Line 4: <i>slSiteID</i>	The SiteLock site ID (string). This parameter is only present if a SiteLock licence is the only product ordered.
